TECHNICAL FEATURES

SPECIFICHE TECNICHE

Steel inner frame covered by hard injection fireproof foam padding.
Benches and connection panels are made with an internal multilayer beechwood structure, cover by high density poliurethane foam.
Aluminum feet; steel legs or mdf table leg available for bench version.

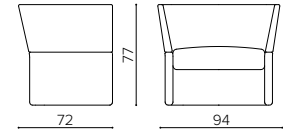

Struttura interna del divano realizzata in acciaio, annegata in schiuma poliuretantica flessibile e rivestita. I pannelli di connessione e la panca hanno struttura interna in multistrato di faggio spessore 20 mm, imbottiti con poliuretano espanso indeformabile.
Piedini di appoggio in alluminio; sostegno della panca in acciaio verniciato o con tavolo in mdf laccato.

ACOUSTIC FEATURES / CARATTERISTICHE ACUSTICHE

Oracle High Back Sofa and Armchair, thanks to their high enclosing lateral and rear wall, provide a very high absorption and a good impression of being protected from the outer environment, as proved by the acoustic lab tests. These elements can be used for creating small areas of privacy for a chat or a phone call, reducing the overall noise of the surrounding ambience. They can therefore create a quiet island in big reverberating environments like hotel lobbies, fair halls or airports.

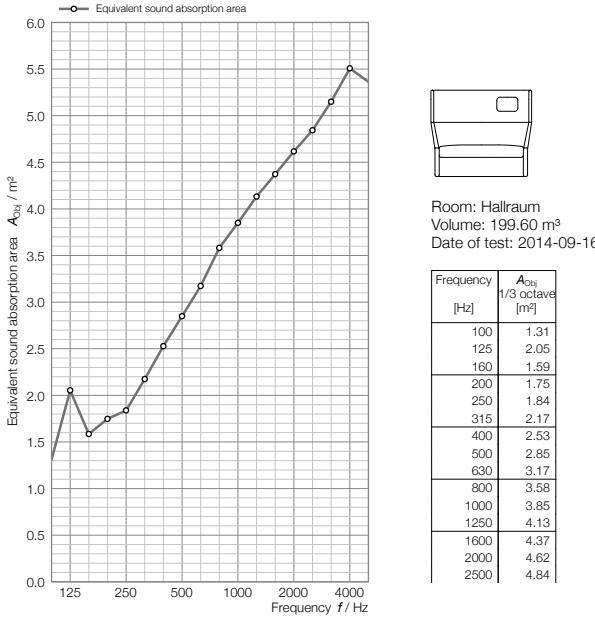

OR 100H

The Oracle High Back Sofa and Armchair were tested in a reverberation chamber, meeting the UNI EN ISO 354 requirements; the equivalent sound absorption area's results are as stated in the graphics above.

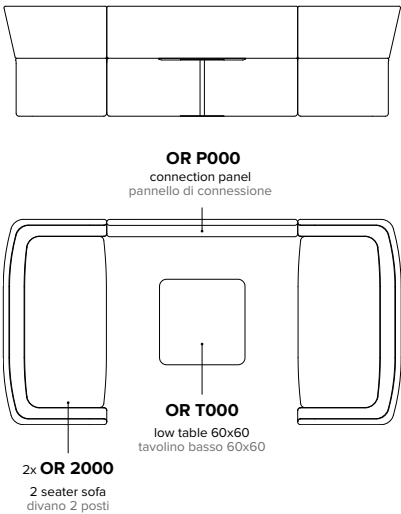

La poltrona e il divano Oracle con struttura alta, grazie alla conformazione avvolgente di schienale e pareti laterali, fornisce un notevole assorbimento del suono ed una confortevole sensazione di protezione dall'ambiente esterno, come provato dai test acustici di laboratorio. Questi elementi possono dunque essere utilizzati per creare piccole aree di privacy per una conversazione o una telefonata, riducendo il rumore di fondo dell'ambiente circostante, fornendo la possibilità di creare isole di quiete in ambienti di grande riverbero, come ad esempio lobby di hotel, padiglioni fieristici e aeroporti.

OR 200H

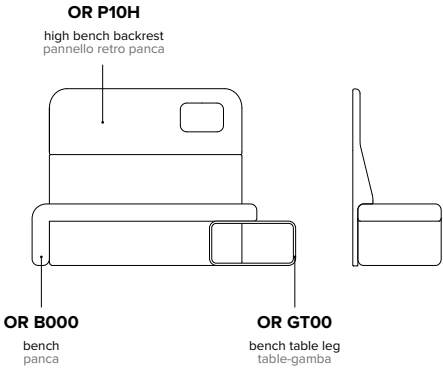

Il divano alto e la poltrona Oracle sono stati testati in camera di risonanza rispettando la normativa UNI EN ISO 354; i risultati relativi all'area equivalente di assorbimento del suono sono mostrati nei grafici in questa pagina.
